Professional Summary

Highly motivated and results-oriented Frontend Developer with demonstrated experience in building scalable and user-friendly web applications. Proficient in Angular, TypeScript, and modern web development practices. Proven ability to optimize application performance and improve user engagement. Eager to contribute to a dynamic team and leverage technical skills to deliver innovative solutions. Seeking a challenging Frontend Developer role to contribute to impactful projects and drive significant results.

Experience

Junior Angular Developer

Nomd Technologies | Kochi   2023/08 – Present

- Developed and implemented three core Angular modules (Alert, Asset, and Driver Management) for a Fleet Management System, enhancing user engagement and reducing operational costs within the first quarter.
- Optimized Angular application performance by implementing efficient state management and lazy loading modules, reducing initial page load time and improving the Lighthouse performance score.
- Delivered a user-centric access management application using Angular, reducing access issues and enhancing overall client satisfaction.
- Integrated RESTful APIs with Angular services using RxJS observables, enabling seamless data flow and dynamic content updates, reducing data processing time and supporting increased API request volume.
- Led the migration of legacy JavaScript components to TypeScript within a team of developers, reducing reported bugs and improving code maintainability for a widely used codebase.

Projects

Fleet Management System (FMS)   −

Designed and developed a centralized platform for managing vehicle assets, improving tracking efficiency, asset management, and driver management. Delivered optimized solutions to streamline daily operational workflows.

AMS-Access Management System: −

Contributed to the development of a secure access management system for Qiddiya (Saudi organization), streamlining employee access and security protocols, while ensuring compliance with industry security standards.

E-Commerce Website: −

Built a responsive fashion e-commerce platform using Angular, ensuring seamless cross-device compatibility. Developed both admin and user-side applications, integrating third-party APIs for product search and user authentication to enhance user experience and functionality.

Certifications

The Angular Complete Guide - Udemy

Programming for Everybody (Python) - University of Michigan

UI/UX Design and Frontend Development (HTML & CSS).

Skills

Angular	TypeScript	HTML	CSS
JavaScript	RxJS	Bootstrap	RESTful APIs
Git , Bitbucket , JIRA	Figma	Agile Development	Responsive Design

Education

KMEA ENGINEERING COLLEGE

Bachelor of Technology in Computer Science   2019/07 – 2023/07
